

AyrKing Corporation

Vacuum Marinator

AyrKing offers a vacuum marinating solution that quickly and easily enhances the flavor profile of your menu items. The pressurized drum drastically reduces marinating times compared to tumble only or overnight marination processes. Your marinade quickly becomes thoroughly infused in your product for a fantastic and full flavor profile in every bite!

MODELS

#VM101-120

120V Vacuum/Tumble Marinator, 37”L by 20”W,
with an 80L [21 gallon] stainless drum volume

#VM101-220

220V Vacuum/Tumble Marinator, 37”L by 20”W,
with an 80L [21 gallon] stainless drum volume

Optional Accessories

Part#5001996-135

Safety Cover for Drum

Part#5004151

Plastic tub w/ lid

Part#5004152

Perforated drain inset for plastic tub

Operating Instructions

Set desired times for vacuum period and for tumbling cycle. These two separate timers are behind access panels to prevent tampering. Fill drum with your product and marinade. Connect vacuum hose to drum and press start button for vacuum timer. Disconnect vacuum hose when timer stops vacuum pump. Replace vacuum hose quick-connect on safety interlock switch at base. Press start button for tumble timer. When unit stops tumbling, empty marinated product into pan below the drum. Vacuum process cannot be bypassed as tumbling will not begin without prior vacuum action.

Mobility/Cleaning

Unit is mounted on locking casters for mobility. Marinator can be stored under a worktable. Simply remove drum from cart and wash in sink or dishwasher. It's that easy!

Unit Features

Vacuum pressure gauge

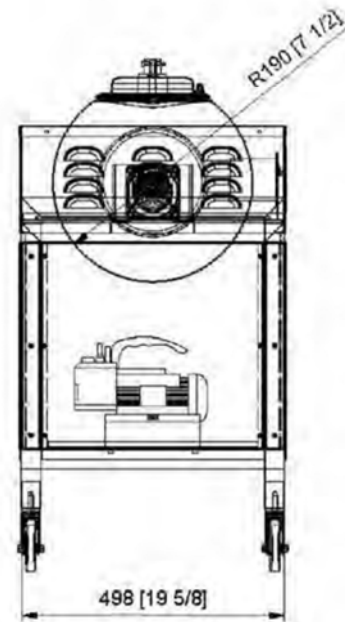

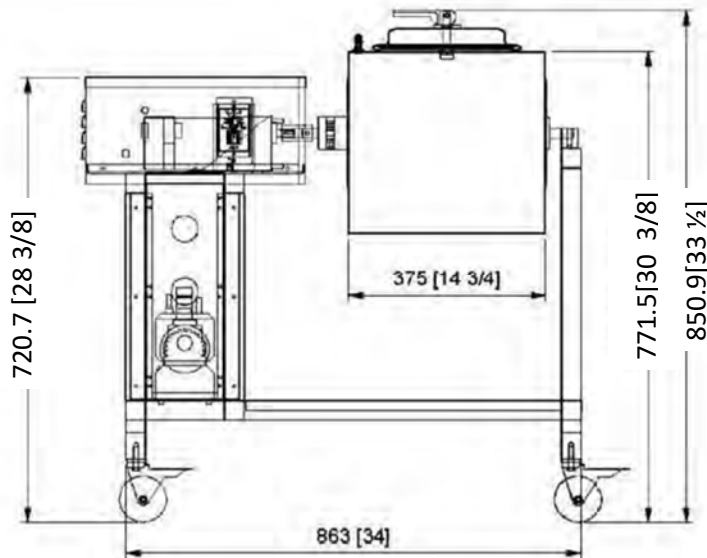

Analog vacuum timer control with digital readout and infinite control for marinating time
(Both timers behind access panels)
