Breader/Blender/Sifter

SPECIFICATION

The AyrKing BBSU4830BPC241 is a manual breading workstation with integrated automatic Blender/Sifter machine. AyrKing's rotary brush sifter operates without detrimental vibration or agitation. AyrKing's brush is made of spirally configured nylon bristles which form an auger to eject unwanted dough balls to waste container. During the sifting process ingredients are fully blended as the brush tumbles breading media before it exits through the sifter screen. AyrKing's unique process prevents dough ball grinding, eliminates the usual sifting noise, & blends ingredients as it ejects waste.

ADVANTAGES

- Sift and blend 30 lbs (14 kg) of breading in 60 seconds!
- Rotary auger brush blends, sifts, and ejects dough balls simultaneously
- Blending brush action prevents ingredient segregation, unlike vibrating or agitating systems
- Quiet, vibration-free operation creates results, not disturbances
- Sixty second timed cycle frees labor and saves energy
- Raised stainless steel lip around sifter opening prevents tabletop spills from contaminating sifted breading
- Fully enclosed sifter with only four internal parts, reduces dust and allows quick and easy cleaning
- Direct drive, steel geared motor & solid stainless steel fabrication provide lasting performance
