

AyrKing Corporation

COUNTERTOP WORKSTATION

AyrKing offers a countertop workstation for your hand breadring operations. This workstation consists of a full square tubing frame and stainless steel panels to keep a messy operation contained, but easily removable for quick cleanup. The full size cold pans keep the product at a desired temp, but are easy to swap midday when necessary. Pans can be interchanged to fit whatever layout works best for your flow. Bun pan clips allow for a great compact placement for finished product. Accessory holders for utensils and boxes of gloves also included for easy access.
