Breader/Blender/Sifter

SPECIFICATION

The AyrKing BBSU5730BPB241 is a manual breading workstation featuring an integrated automatic Blender/Sifter. Its rotary brush sifter uses spirally configured nylon bristles to blend breading ingredients while separating and ejecting unwanted doughballs into a waste container without excessive vibration or agitation. As the breading passes through the sifter, the brush thoroughly mixes ingredients to maintain a consistent blend. This unique process prevents dough ball grinding, reduces operating noise, and continuously blends ingredients while removing waste.

ADVANTAGES

- Sift and blend 30 lbs (14 kg) of breading in 60 seconds
- Rotary auger brush blends, sifts, and ejects dough balls simultaneously
- Blending brush action prevents ingredient segregation, unlike vibrating or agitating systems
- Quiet, vibration-free operation creates results, not disturbances
- Sixty second timed cycle frees labor and saves energy
- Raised stainless steel lip around sifter opening prevents tabletop spills from contaminating sifted breading
- With only three internal parts, the fully enclosed sifter reduces dust and allows for quick and easy cleaning
- Direct drive, steel geared motor & solid stainless steel fabrication provide lasting performance
