Breader/Blender/Sifter

SPECIFICATION

The AyrKing BBSUL1436A combines a manual breading workstation with an integrated automatic blender/sifter. Its rotary brush sifter operates without excessive vibration or agitation, while spirally configured nylon bristles form an auger that ejects unwanted dough balls into a waste container. As the brush tumbles the breading media through the sifter screen, ingredients are thoroughly blended. This unique process prevents dough ball grinding, reduces sifting noise, and blends ingredients while removing waste.

ADVANTAGES

- Sift and blend 30 lbs (14 kg) of breading in 60 seconds!
- Rotary auger brush blends, sifts, and ejects dough balls simultaneously
- Blending brush action prevents ingredient segregation, unlike vibrating or agitating systems
- Quiet, vibration-free operation creates results, not disturbances
- Sixty second timed cycle frees labor and saves energy
- Fully enclosed sifter with only four internal parts, reduces dust and allows quick and easy cleaning
- Direct drive, steel geared motor, & solid stainless steel fabrication provide lasting performance
